Kills 99.9% of Bacteria, Viruses,
and Fungi in 3 minutes
Kills Norovirus in Just 4 Minutes
Eliminates 99.9% of All Allergens†

Bioesque Botanical Disinfectant Solution cleans, disinfects, deodorizes, and leaves a fresh botanical scent. Formulated with patented technology, this product is non-toxic, non-irritating, and safe for use around children and pets.

**KILLS 99.9% ON PRECLEARED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BIOESQUE DISINFECTANT SOLUTION.** To achieve the kill claims stated in the table below, soil the surface with 100CFU/mL of the indicated pathogen for 5 minutes. Inactivate pathogens on hard, non-porous surfaces using 500 parts per million (ppm) of the solution in which the solution is applied for the specified contact time. For the disinfection of inanimate surfaces/others to objects with body/food fluids and in which the surface/object likely to be soiled with body/food fluids or fluids that may become contaminated with respiratory secretions (sputum, saliva, vomit, and/or stool) from patients/patients with respiratory disease, urinary incontinence, or diarrhea, or from infants in diapers, use 500 ppm of the solution in which the solution is applied for the specified contact time. In the disinfection of inanimate surfaces/others to objects with body/food fluids and in which the surface/object likely to be soiled with body/food fluids may be contaminated with respiratory secretions (sputum, saliva, vomit, and/or stool) from patients/patients with respiratory disease, urinary incontinence, or diarrhea, or from infants in diapers, use 1000 ppm of the solution in which the solution is applied for the specified contact time.

**NOTE:** The following contact times are based on studies that used the Bioesque Botanical Disinfectant Solution at 10 ppm and 500 ppm of the solution in which the solution is applied. The contact times are not based on studies that used the Bioesque Botanical Disinfectant Solution at 1000 ppm of the solution in which the solution is applied.

**DISCLAIMER:** All claims on this product are based on data obtained from independent laboratories. The product has been shown to be effective for the treatment of a wide range of pathogens, but the effectiveness of the product may vary depending on factors such as the type of surface, the environment, and the specific conditions present. As with any product, it is important to follow the recommended guidelines and safety precautions provided by the manufacturer. For more information, please contact the manufacturer or your local health authorities.
