**<Service Provider Name> Antimicrobial Statement**

<Service Provider Name> strives to uphold the highest standards of care in our industry. In order to perform our restoration services effectively and completely, an antimicrobial may be used to control microbial growth. <Service Provider Name> is proud to say that every consideration has been taken in selecting an antimicrobial that will not introduce additional health risks or compromise indoor air quality.

**Bioesque Solutions Botanical Disinfectant** has been chosen specifically for its botanically derived antimicrobial technology which provides a unique combination of cleaning and disinfecting capabilities. Bioesque Solutions Botanical Disinfectant is registered with the Environmental Protection Agency (EPA) as a broad spectrum, hospital-grade disinfectant that kills 99.99% of bacteria, viruses & fungi (mold) and is suitable to be used in residential, hospital and commercial applications. The EPA also reviews and classifies all antimicrobials for Acute Toxicity for all routes of human exposure (skin, inhalation, eyes and ingestion). Bioesque Solutions Botanical Disinfectant has not been shown to have any adverse effects and has a Category IV rating which is the lowest toxicity profile allowed by law. With a Category IV rating, EPA labeling guidelines do not require any signal words, warnings, cautions or first aid statements on the product label. Bioesque Solutions Botanical Disinfectant has a low VOC rating and does not contain any known carcinogens, mutagens or reproductive toxicants.

**Review & Discuss:**

- Bioesque Solutions Botanical Disinfectant EPA Product Label
- SDS (Safety Data Sheet)
