Directions For Use:

Before using this product test in a small inconspicuous area for colorfastness or other surface effects.

Hard Surfaces: Remove excess solid or waste liquids. Apply Neutralizer at full strength to the affected surface and let sit on the surface for a few minutes, allowing the enzymes time to work and wipe dry. Repeat if necessary. If applied to a food contact surface, rinse thoroughly before use.

Carpet & Rugs: Remove excess solid or waste liquids. Apply Neutralizer to affected area and around it, fully saturating. Gently agitate product into affected area, working from outside of spot to inside. Wait 15 minutes, then use a clean, absorbent towel, blotting the area to lift contaminants and any excess moisture, (or use water extraction equipment to remove). Repeat blotting/extraction process 2-3x to aid in drying. When dry, vacuum until any residual mess has been removed.

Upholstery: Dilute at a 1:1 ratio with warm water. Dab on affected area with a clean cloth or spray to achieve a thin, visible coating. Wait 15 minutes, then use a clean, absorbent towel, blotting the area to lift contaminants and any excess moisture, (or use water extraction equipment to remove). When dry, vacuum until any residual mess has been removed.

For more difficult stains, repeat treatment as necessary.
