NET CONTENTS: 1 GALLON (3.78 L)

Directions For Use:

General Dilution Guidelines:

Heavy Duty:

Dilute 32 ounces per gallon (1:4)

Medium Duty:

Dilute 21 ounces per gallon (1:6)

Light Duty:

Dilute 9 ounces per gallon (1:14.2)

Read Before Using:

- To achieve the best performance, experiment in a small test area with various dilutions before applying generally. Start from low dilution ratio and work up.
- Dilute before using. Do not use on painted surfaces or wooden floors. Use cautiously for stripping linoleum, rubber or asphalt tile as stripper may cause bleaching, softening or bleeding.
- Wipe up any spills or splashes from baseboards or painted surfaces immediately.

Directions:

1. Dust mop
2. To remove heavy build-up, dilute 1 part stripper with 4 parts water (32 oz./gal).
3. Before applying to entire floor, test on a small, inconspicuous area.
4. Apply liberally to floor covering 100 square feet at a time. Be sure to leave surface VERY wet!
5. Allow to remain on floor 5 to 10 minutes. Agitate for 100% removal of old floor finish.
6. Pick up solution using a wet vac or auto-scrubber. If any finish remains (around baseboards), reapply stripping solution and agitate as necessary.
7. Rinse floor thoroughly. Allow floor to dry.
8. Apply High Gloss Floor Finish

Note:

For stripping and maintaining asbestos containing tile, follow OSHA guidelines or EPA guidelines.
